 SHARKCOMMUNICATION

NORDIC  ISSUING

Initiator Pharma is a Danish life sciences company focusing on the development of innovative drugs, targeting key unmet medical needs within the central and peripheral nervous system. Initiator's research is focusing on monoamine reuptake inhibitors, molecules that are modulating the synaptic concentrations of neurotransmitters such as dopamine, serotonin and noradrenaline.

The major part of the capitalization will finance an expansion of Initiator's clinical pipeline with an additional disease indication. The new program will target the neuropathic pain Indication Trigeminal Neuralgia, a rare disease with a prevalence of 10-20 per 100,000 where the female-to-male ratio is about 3:2 and the disease is more common above 50 years of age.

Trigeminal Neuralgia is a debilitating orofacial pain condition characterized by sudden onset of an extreme, short-duration yet debilitating pain, often referred to as suicidal pain. There is only one FDA-approved pharmacological treatment for Trigeminal Neuralgia available, Carbamazepine. The treatment only provides limited pain relief and is associated with a significant number of side effects. Therefore, the unmet need for a new efficacious, tolerable and safe treatment is exceptionally high. It is Initiator Pharma's ambition to develop a First-Line treatment for these patients.

Thus, Initiator Pharma will advance a pipeline with three clinical programs. The previously communicated priorities remain for the already ongoing and upcoming clinical trials in Phase II with IP2018 and IPED2015 for treatment of erectile dysfunction of psychogenic and organic origin, respectively.

The new candidate drug – IPTN2021 – is based on Initiator Pharma's IP2015 assets that already have proven safe and tolerable in clinical trials and have demonstrated efficacy for erectile dysfunction. The preclinical data package for IPED2015 also consists of substantial effects in animal pain models and provides the scientific rationale for expanding into the pain field. The intent is to start with a Proof-of-Principle Pain study in healthy volunteers with inflected pain and then follow up with a Phase II trial including Trigeminal Neuralgia patients.

The clinical development timeline and commercial attractiveness of the program will benefit from the opportunity to apply for Orphan Drug Designation and subsequent Fast Track designation or conditional approval by the FDA or EMA, respectively. The interaction with the regulatory authorities will provide valuable guidance for both the design of the first IPTN2021 trial in patients and for a potential subsequent registration trial.

The proceeds will finance the clinical development of the new Orphan Drug indication and secure a solid runway for Initiator Pharma well into 2023 covering both the company's operational costs and the continuation of the already ongoing and upcoming clinical trials with IP2018 and IPED2015 for treatment of erectile dysfunction of psychogenic and organic origin, respectively.

INITIATOR'S DRUG CANDIDATES, BESIDES THE NEWLY ADDED IPTN2021, ARE:

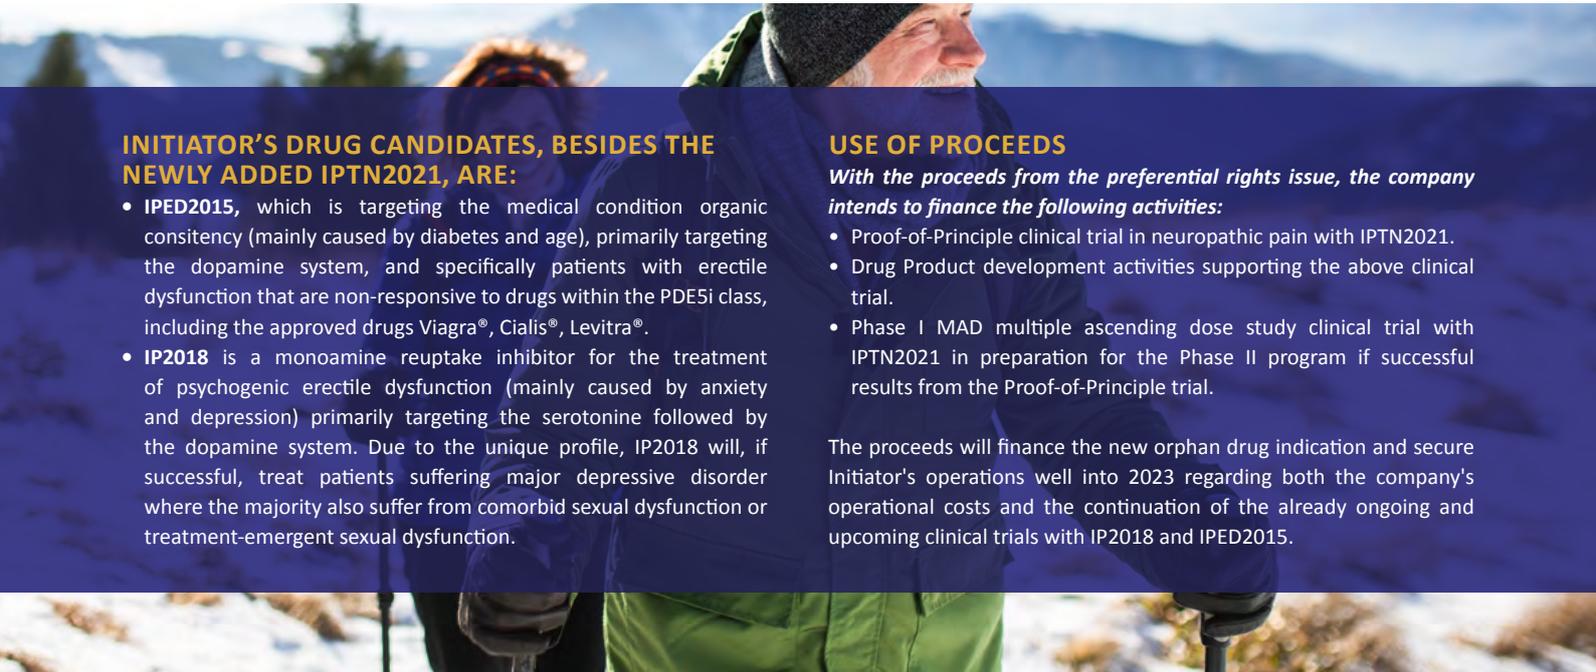

- **IPED2015**, which is targeting the medical condition organic consistency (mainly caused by diabetes and age), primarily targeting the dopamine system, and specifically patients with erectile dysfunction that are non-responsive to drugs within the PDE5i class, including the approved drugs Viagra®, Cialis®, Levitra®.
- **IP2018** is a monoamine reuptake inhibitor for the treatment of psychogenic erectile dysfunction (mainly caused by anxiety and depression) primarily targeting the serotonin followed by the dopamine system. Due to the unique profile, IP2018 will, if successful, treat patients suffering major depressive disorder where the majority also suffer from comorbid sexual dysfunction or treatment-emergent sexual dysfunction.

USE OF PROCEEDS

With the proceeds from the preferential rights issue, the company intends to finance the following activities:

- Proof-of-Principle clinical trial in neuropathic pain with IPTN2021.
- Drug Product development activities supporting the above clinical trial.
- Phase I MAD multiple ascending dose study clinical trial with IPTN2021 in preparation for the Phase II program if successful results from the Proof-of-Principle trial.

The proceeds will finance the new orphan drug indication and secure Initiator's operations well into 2023 regarding both the company's operational costs and the continuation of the already ongoing and upcoming clinical trials with IP2018 and IPED2015.

CEO Claus Elsborg Olesen comments

The medical need for a new effective treatment for ED is massive, expected to affect more than 300 million men worldwide by 2025. Initiator Pharma's two main assets, IPED2015 and IP2018, are both clinical phase drug candidates in the field of erectile dysfunction, and both candidates represent First in Class treatments within their indication and are expected to improve the quality of life for a growing number of patients who are not responding to, or cannot be treated with, existing drugs on the market. Recently we expanded our clinical portfolio and added a third clinical program, the orphan drug candidate IPTN2021. The new clinical program strongly complements our promising current clinical pipeline, supporting our ambition to bring functional medication to patients in need and to create value for our shareholders.

The major part of the raised capital from the preferential rights issue will be used to finance the expansion of Initiator's clinical pipeline, and specifically the development of IPTN2021. The new program will target the orphan neuropathic pain indication Trigeminal Neuralgia, a rare disease with a prevalence of 10-20 per 100,000 where the female-to-male ratio is about 3:2, and the disease is more common above 50 years of age. Trigeminal Neuralgia is a debilitating orofacial pain condition characterized by sudden onset of an extreme, short-duration yet debilitating pain, often referred to as suicidal pain. There is only one FDA-approved pharmacological treatment for Trigeminal Neuralgia available, named Carbamazepine. The treatment only provides limited pain relief and is associated with a significant number of side effects. Therefore, the unmet need for a new efficacious, tolerable and safe treatment is exceptionally high. It is Initiator Pharma's ambition to develop a First-Line treatment for these patients.

The clinical development timeline and commercial attractiveness of the program will benefit from the opportunity to apply for Orphan Drug Designation and subsequent Fast Track designation or conditional approval by the FDA or EMA, respectively. The interaction with the regulatory authorities will provide valuable guidance for both the design of the first IPTN2021 trial in patients and for a potential subsequent registration trial.

Our intention is to start with a Proof-of-Principle Pain IPTN2021 trial in healthy volunteers with inflected pain and then follow up with a Phase II trial including Trigeminal Neuralgia patients.

IPTN2021 is based on Initiator Pharma's IP2015 assets that already have proven safe and tolerable in clinical trials and have demonstrated efficacy for ED in a Phase IIa Proof-of-Concept study. We recently received CTA approval for a Phase IIb study with IPED2015 in ED patients, which will be carried out in collaboration with MAC Clinical Research, UK, at multiple centers across UK. The preclinical data package for IPED2015 also consists of substantial effects in animal pain models and provides the scientific rationale for expanding into the pain field.

Besides the development of the orphan drug candidate IPTN2021, the proceeds from the preferential rights issue will also finance the already ongoing and upcoming clinical trials with IPED2015 and IP2018 and secure a solid runway for Initiator Pharma well into 2023.

When summarizing the above, Initiator Pharma is in an extremely exciting phase. We have a pipeline with three clinical-stage programs, all with upcoming key value inflection points in the form of Phase II data read-outs over the next couple of years. To support these clinical programs, we have also recently strengthened our management team and will continue to do so over the next few months. Through the recently performed directed issue we also strengthened our investor base with specialized and long-term investors led by Linc AB and Adrigo Asset Management AB.

I am confident that Initiator Pharma can make a change in people's lives, and I really look forward to continue driving the company forward. I hereby invite both new and already existing shareholders to take part in the exciting journey we are on.
