Protocol specifications

The OUCH specification will be updated with a value in existing field for the XSAT MIC code, and will be available at the Nasdaq Nordic Technical Information website at a later point, under [INET Nordic Protocol Specifications. No changes to FIX protocol specifications.](#)

Reference data will be available via GCF-TIP, and existing INET protocols are used for all inbound and outbound messaging.

Member access

Members wanting to access the new Spotlight Market Segments will automatically get access in INET Nordic NTF.

INET Nordic Production access information will be announced separately.

For any access related inquiries, please reach out to Member & Account Configuration (mac@nasdaq.com)

Market Data access

Spotlight data will be included in Nordic Equity data products, but added only on request to *Genium Consolidated Feed* (GCF) customer accounts. Separate new reference data- and end-of-day-files for XSAT will be made available on *File Delivery Service* (FDS).

If a Nordic Equity market data customer requires Spotlight exchange to be added to one or more accounts in Genium Consolidated Feed (GCF) please contact: dataeurope@nasdaq.com

Time schedule

- INET Test (NTF) and GCF TST4 – July 3 (further market parametrization will continue, separate notice will be released to confirm a final state)
- INET and GCF Production – will be announced separately
